This book will advance the understanding and application of self-adaptive intelligent systems; therefore it will potentially benefit the long-term goal of replicating certain levels of brain-like intelligence in complex and networked engineering systems. It will provide new approaches for adaptive systems within uncertain environments. This will provide an opportunity to evaluate the strengths and weaknesses of the current state-of-the-art of knowledge, give rise to new research directions, and educate future professionals in this domain. Self-adaptive intelligent systems have wide applications from military security systems to civilian daily life. In this book, different application problems, including pattern recognition, classification, image recovery, and sequence learning, will be presented to show the capability of the proposed systems in learning, memory, and prediction. Therefore, this book will also provide potential new solutions to many real-world applications.

Combating the Class Imbalance Problem in Small Sample Data Sets, Michael Wasikowski, 2009, 105 pages. Keywords: Class imbalance problem, feature evaluation and selection, machine learning, pattern recognition, bioinformatics, text mining.

An Introduction to Neural Networks, James A. Anderson, 1995, Computers, 672 pages. "An Introduction to Neural Networks" falls into a new ecological niche for texts. Based on notes that have been class-tested for more than a decade, it is aimed at cognitive.

Self-Adaptive Systems for Machine Intelligence, Haibo He, Aug 9, 2011, Computers, 230 pages. This book will advance the understanding and application of self-adaptive intelligent systems; therefore it will potentially benefit the long-term goal of replicating certain.

Computational Intelligence and Its Applications Evolutionary Computation, Fuzzy Logic, Neural Network and Support Vector Machine Techniques, H. K. Lam, Steve H. Ling, Hung T. Nguyen, 2012, Computers, 307 pages. This book focuses on computational intelligence techniques and their applications "fast-growing and promising research topics that have drawn a great deal of

Regularization Methods for Support Vector Machines, Zhili Wu, 2008, Machine learning, 128 pages. Support Vector Machine (SVM) in a broad sense refers to the learning approaches that only a subset of data/feature vectors are used to support the model construction while.

Cost-sensitive Boosting for Classification of Imbalanced Data, Yanmin Sun, University of Waterloo. Department of Electrical and Computer Engineering, 2007, 181 pages. The classification of data with imbalanced class distributions has posed a significant drawback in the performance attainable by most well-developed classification systems.

A connectionist machine for genetic hillclimbing, David H. Ackley, 1987, Computers, 260 pages. It is a good source for those interested in a concrete application of Boltzmann machines or (at several places) thoughtful treatise on their potential impact on the broader.

Data Mining And Knowledge Discovery Technologies, David Taniar, 2008, Business & Economics, 369 pages. As information technology continues to advance in massive increments, the bank of information available from personal, financial, and business electronic transactions and all.

Colors for brides how to use your seasonal colors to plan your wedding, your trousseau, and your first home, Lauren Smith, Kathleen Hughes, Jun 1, 1990, Health & Fitness, 248 pages. A guide to planning a wedding offers advice on how to select harmonious colors for the gown, the groom's suit, the bridesmaids' dresses, and the flower arrangements.

The StarQuest, Mark David Gerson, May 18, 2014, Fiction, 262 pages. TRAVEL BACK IN TIME TO THE Q'NTANA BEFORE THE MOONQUEST... Here, in the midst of a brutal tyranny, a legend would not die...of the Heart of the Star and of the Fair One who Self-Adaptive Systems for Machine Intelligence Haibo He 250 pages

Thinking in images film theory, feminist philosophy and Marlene Dietrich, Catherine Constable, British Film Institute, 2005, Performing Arts, 202 pages. Thinking in Images addresses the current crisis in film theory by offering a new methodology for interrelating theory and film texts First published in 2000. Routledge is an imprint of Taylor & Francis, an informa company. This book offers instruction and explanation of 75 of the most commonly used and useful knots. All the key types, such as bends, hitches, knots, bindings, loops, mats, plaits. Millions of people provide unpaid care for disabled or elderly relatives, friends, or neighbors. Their job is long, lonely, and hard, yet there is limited support and no formal.
